Journal of
Computational Chemistry

Volume Contents
Volume 19, 1998
Issue 1, January 15, 1998

Generation of Crystal Structures of Acetic Acid and Its Halogenated Analogs 1
R. S. Payne, R. J. Roberts, R. C. Rowe, and R. Docherty

Docking Small Ligands in Flexible Binding Sites 21
Joannis Apostolakis, Andreas Plückthun, and Amedeo Caflisch

Quantum Mechanical/Molecular Mechanical Self-Consistent Madelung Potential Method for Treatment of Polar Molecular Crystals 38
György G. Ferenczy, Gábor I. Csonka, Gábor Náray-Szabó, and János G. Ángyán

Descriptors for Amino Acids Using MolSurf Parametrization 51
Ulf Norinder and Peter Svensson

Conformational Search Using a Molecular Dynamics–Minimization Procedure: Applications to Clusters of Coulombic Charges, Lennard–Jones Particles, and Waters 60
Zhenqin Li, Keith E. Laidig, and Valerie Daggett

B-Spline Method for Energy Minimization in Grid-Based Molecular Mechanics Calculations 71
Daniel Oberlin, Jr. and Harold A. Scheraga

Molecular Dynamics Simulation of Organic Glass Formers: I. *ortho*-Terphenyl and 1,3,5-Tri-α-Naphthyl Benzene 86
Jane J. Ou and Shaw H. Chen

Calculation of the Rovibrational Energy Levels of Diatomic Molecules by Dunham Method with Potential Obtained from *Ab Initio* Calculations 94
Alexander V. Mitin

SHAKE, Rattle, and Roll: Efficient Constraint Algorithms for Linked Rigid Bodies 102
Timothy R. Forester and William Smith

Issue 2, January 30, 1998

Editor's Preface v
Paul von R. Schleyer

A Portrait of the Chemist: The Lou Allinger Story vii
J. Philip Bowen

Theoretical Investigations of NMR Chemical Shifts and Reactivities of Oxovanadium (v) Compounds 113
Michael Bühl and Fred A. Hamprecht

Molecular Structures and Conformations: Experiment and Theory 123
Heinz Oberhammer

Effect of Nonproximate Atomic Substitution on Excited State Intramolecular Proton Transfer 129
Martin Čuma, Clifton Thompson, and Steve Scheiner

Organometallic Chemistry of Fullerenes: η^2- and η^5-(π) Complexes 139
R. C. Haddon

Molecular Dynamics Simulations of Sorption of Organic Compounds at the Clay Mineral/Aqueous Solution Interface 144
Brian J. Teppen, Ching-Hsing Yu, David M. Miller, and Lothar Schäfer

Evaluation of Density Functional Theory in the Bond Rupture of Octane 154
E. Goldstein, M. Haught, and Y. Tang

Symmetry Groups for Unit Cells in Solids 168
James J. P. Stewart

C_3—M_α Bond Contribution to Polarizability Tensor and $^3J(C_1M_\alpha)$ NMR Coupling Constant in 1-*X*-3-*M*-Bicyclo[1.1.1]Pentanes 181
C. G. Giribet, M. C. Ruiz de Azúa, S. B. Gómez, E. L. Botek, R. H. Contreras, W. Adcock, E. W. Della, A. R. Krstic, and I. J. Lochert

Bowl-Shaped Hydrocarbons Related to C_{60} 189
Jerome M. Schulman, Raymond L. Disch

Approach to Regiochemistry Using Local Softness in 1,3-Dipolar Cycloadditions 195
Asit K. Chandra and Minh Tho Nguyen

Structure and Stability of B_{13}^+ Clusters 203
Feng Long Gu, Xiaomei Yang, Au-Chin Tang, Haijun Jiao, and Paul von R. Schleyer

Evaluation of Reactivity for Nitroxide Radical Trapping by Correlation Analysis Using Steric Substituent Parameter (Ω_s) 215
Keiji Iwao, Kazuhisa, Sakakibara, and Minoru Hirota

Thermal Isomerizations of Vinylcyclopropanes to Cyclopentenes 222
John E. Baldwin

Recent Advances in the Structural Determination of Endohedral Metallofullerenes 232
Shigeru Nagase, Kaoru Kobayashi, and Takeshi Akasaka

Theoretical Investigation of Unimolecular Decomposition Channels of Furan4 240
Ruifeng Liu, Xuefeng Zhou, and Lei Zhai

Protonation Enthalpies in Fluorosulfonic Acid Using *Ab Initio* Self-Consistent Reaction Field Theory 250
Nathan J. Harris, Tomohiko Ohwada, and Koop Lammertsma

Issue 3, February 1998

United-Residue Force Field for Off-Lattice Protein-Structure Simulations: III. Origin of Backbone Hydrogen-Bonding Cooperativity in United-Residue Potentials 259
A. Liwo, R. Kaźmierkiewicz, C. Czaplewski, M. Groth, S. Ołdziej, R. J. Wawak, S. Rackovsky, M. R. Pincus, and H. A. Scheraga

Theoretical Study of Reaction of Trifluoromethyl Radical with Hydroxyl and Hydrogen Radicals 277
Haruhiko Fukaya, Taizo Ono, and Takashi Abe

Solvation Effects on Reaction Profiles by the Polarizable Continuum Model Coupled with the Gaussian Density Functional Method 290
Tzonka Mineva, Nino Russo, and Emilia Sicilia

Symbolic Algebra in Functional Derivative Potential Calculations 300
Patrick Ĭemmer, and Peter J. Knowles

Comparison of *Ab Initio* and Density Functional Methods for Vibrational Analysis of $TeCl_4$ 308
Attila Kovács, Gábor I. Csonka, and György M. Keserű

Exact and Efficient Analytical Calculation of the Accessible Surface Areas and Their Gradients for Macromolecules 319
Robert Fraczkiewicz and Werner Braun

Combined *Ab Initio*/Empirical Approach for Optimization of Lennard–Jones Parameters 334
Daxu Yin and Alexander D. Mackerell, Jr.

How Good Is a Broyden–Fletcher–Goldfarb–Shanno-like Update Hessian Formula to Locate Transition Structures? Specific Reformulation of Broyden–Fletcher–Goldfarb–Shanno for Optimizing Saddle Points 349
Josep Maria Anglada and Josep Maria Bofill

Effect of Available Volumes on Radial Distribution Functions 363
Timothy Astley, Gordon G. Birch, Michael G. B. Drew, P. Mark Rodger, and Gareth R. H. Wilden

Analysis of the Convergence of the General Coupling Operator Method for One-Configuration-Type Wave Functions 368
Josep Maria Bofill, Hugo Bono, and Jaime Rubio

Issue 4, March 1998

Comparison of Methods for Deriving Atomic Charges from the Electrostatic Potential and Moments 377
Emma Sigfridsson and Ulf Ryde

Monte-Carlo Model for the Hydrogenation of Alkenes on Metal Catalyst 396
Dario Duca, Péter Baranyai, and Tamás Vidóczy

Geometry Optimization of Molecular Structures in Solution by the Polarizable Continuum Model 404
Vincenzo Barone, Maurizio Cossi, and Jacopo Tomasi

Implementation and Validation of the Lacks-Gordon Exchange Functional in Conventional Density Functional and Adiabatic Connection Methods 418
Carlo Adamo and Vincenzo Barone

Derivation of Class II Force Fields: V. Quantum Force Field for Amides, Peptides, and Related Compounds 430
J. R. Maple, M.-J. Hwang, K. J. Jalkanen, T. P. Stockfisch, and A. T. Hagler

Crystal Structure Predictions for Acetic Acid 459
Wijnand T. M. Mooij, Bouke P. van Eijck, Sarah L. Price, Paul Verwer, and Jan Kroon

Issue 5, April 15, 1998

Effect of Inclusion of Electron Correlation in MM3 Studies of Cyclic Conjugated Compounds 475
Julia C. Tai and Norman L. Allinger

Radial Behavior of Gradient Expansion Approximation to Atomic Fukui Function and Shell Structure of Atoms 488
L. F. Pacios and P. C. Gómez

Graphical Approach for Defining Natural Internal Coordinates 504
Cory C. Pye and Raymond A. Poirier

Molecular Mechanics Modeling of Organic Backbone of Metal-Free and Coordinated Ligands 512
Johan E. Bol, Christian Buning, Peter Comba, Jan Reedijk, and Marc Ströhle

Ab Initio Conformational Analysis of Cyclooctane Molecule 524
Willian R. Rocha, Josefredo R. Pliego, Jr., Stella M. Resende, Hélio F. dos Santos, Marcos A. de Oliveira, and Wagner B. de Almeida

Parametrization of Aliphatic CH_n United Atoms of GROMOS96 Force Field 535
Xavier Daura, Alan E. Mark, and Wilfred F. van Gunsteren

Protein Structure Prediction Using a Combination of Sequence Homology and Global Energy Minimization: II. Energy Functions 459
Michael J. Dudek, K. Ramnarayan, and Jay W. Ponder

Issue 6, April 30, 1998

Comparative Study of BSSE Correction Methods at DFT and MP2 Levels of Theory 575
Béla Paizs and Sándor Suhai

Quantum Chemical Studies on Structures and Spectra of 2,5-Distyrylpyrazine (DSP) Laser Dye 585
Ahmed M. El-Nahas, Essam Hammam, and El-Zeiny M. Ebeid

Natural Resonance Theory: I. General Formalism 593
E. D. Glendening and F. Weinhold

Natural Resonance Theory: II. Natural Bond Order and Valency 610
E. D. Glendening and F. Weinhold

Natural Resonance Theory: III. Chemical Applications 628
E. D. Glendening, J. K. Badenhoop, and F. Weinhold

Stochastic Molecular Optimization Using Generalized Simulated Annealing 647
M. A. Moret, P. G. Pascutti, P. M. Bisch, and K. C. Mundim

Full Configuration Interaction Algorithm on a Massively Parallel Architecture: Direct-List Implementation 658
Elda Rossi, Gian Luigi Bendazzoli, and Stefano Evangelisti

Interactions between Chlorinated Dioxins and a Positively Charged Molecular Probe: New Molecular Interaction Potential 673
James R. Rabinowitz, Stephen B. Little, and Eric M. Gifford

Issue 7, May 1998

Development of a Parallel Molecular Dynamics Code on SIMD Computers: Algorithm for Use of Pair List Criterion 685
D. Roccatano, R. Bizzarri, G. Chillemi, N. Sanna, and A. Di Nola

Multivariate Analysis of a Data Matrix Containing A-DNA and B-DNA Dinucleoside Monophosphate Steps: Multidimensional Ramachandran Plots for Nucleic Acids 695
M. L. M. Beckers and L. M. C. Buydens

Ab Initio Prediction of ^{15}N-NMR Chemical Shift in α-Boron Nitride Based on an Analysis of Connectivities 716
Marcus Gastreich and Christel M. Marian

The Flying Ice Cube: Velocity Rescaling in Molecular Dynamics Leads to Violation of Energy Equipartition 726
Stephen C. Harvey, Robert K.-Z. Tan, and Thomas E. Cheatham III

Systematic Prediction of the Products and Intermediates of Isotopic Labeling in Reaction Pathway Studies 741
Andrew V. Zeigarnik and Raúl E. Valdés-Pérez

Electrostatic Model for Infrared Intensities in a Spectroscopically Determined Molecular Mechanics Force Field 754
Kim Palmo and Samuel Krimm

Solvation Free Energies Calculated Using the GB/SA Model: Sensitivity of Results on Charge Sets, Protocols, and Force Fields 769
M. Rami Reddy, Mark D. Erion, Atul Agarwal, Vellarkad N. Viswanadhan, D. Quentin McDonald, and W. Clark Still

Method of Calculating Band Shape for Molecular Electronic Spectra 781
Greg M. Pearl, M. C. Zerner, Anders Broo, and John McKelvey

Neighbor-List Reduction: Optimization for Computation of Molecular van der Waals and Solvent-Accessible Surface Areas 797
Jörg Weiser, Armin A. Weiser, Peter S. Shenkin, and W. Clark Still

Erratum 809

Issue 8, June 1998

Energetics of Mechanism of OH-Propene Reaction at Low Pressures in Inert Atmosphere 811
J. Raúl Alvarez–Idaboy, Irina Díaz–Acosta, and Annik Vivier–Bunge

van der Waals Host–Guest Complexes: Can One Predict Complexation Selectivity of Neutral Guests by a Cryptophane? MD-FEP Studies in Gas Phase and Chloroform Solution 820
Alexandre Varnek, Severine Helissen, Georges Wipff, and André Collet

Correction of Cavity-Induced Errors in Polarization Charges of Continuum Solvation Models 833
Maurizio Cossi, Benedetta Mennucci, Jesus Pitarch, and Jacopo Tomasi

H ··· H Model Potential for Exchange–Repulsion Energy of Methane Dimer 847
Elena Fraschini and Anthony J. Stone

Adapted Gaussian Basis Sets for Atoms Cs to Lr Based on the Generator Coordinate Hartree–Fock Method 858
F. E. Jorge, P. R. Librelon, and A. Canal Neto

Polarization Effects in Generalized Molecular Interaction Potential: New Hamiltonian for Reactivity Studies and Mixed QM/MM Calculations 866
F. Javier Luque and Modesto Orozco

Photoelectron Spectra, Penning Ionization Electron Spectra, and Character of Canonical Molecular Orbitals 882
Erh-Hao Chen and Tse-Chiang Chang

Multi-Multigrid Solution of Modified Poisson–Boltzmann Equation for Arbitrarily Shaped Molecules 893
Sebastian Tomac and Astrid Gräslund

Computational Study of Methane Activation by Mercury(II) Complexes 902
Thomas R. Cundari and Akihiko Yoshikawa

Rearrangement of Azirine Intermediates to Nitriles: Theoretical Study of Cleavage of 3,4-Dihydro-1a*H*-Azirine[2,3-*c*]Pyrrol-2-One to Cyanoketene–Formaldimine Complex 912
Saturnino Calvo-Losada, José Joaquín Quirante, Dimas Suárez, and Tomás Luis Sordo

Rapid Algorithm for Computing the Electron Repulsion Integral over Higher Order Gaussian-Type Orbitals: Accompanying Coordinate Expansion Method 923
Kazuhiro Ishida

Consistent Valence Force-Field Parameterization of Bond Lengths and Angles with Quantum Chemical *Ab Initio* Methods Applied to Some Heterocyclic Dopamine D_3-Receptor Agonists 935
Katrin Gaedt and Hans-Dieter Höltje

An Investigation of the Quantum Chemical Description of the Ethylenic Double Bond in Reactions: II. Insertion of Ethylene into a Titanium–Carbon Bond 947
Vidar R. Jensen and Knut J. Børve

Influence of Calculation Level and Effect of Methylation on Axial/Equatorial Equilibria in Piperidines 961
Luis Carballeira and Ignacio Pérez–Juste

Molecular Dynamics and Free Energy Perturbation Study of Hydride-Ion Transfer Step in Dihydrofolate Reductase Using Combined Quantum and Molecular Mechanical Model 977
Peter L. Cummins and Jill E. Gready

Issue 9, July 15, 1998

Protonation of Thymine, Cytosine, Adenine, and Guanine DNA Nucleic Acid Bases: Theoretical Investigation into the Framework of Density Functional Theory 989
Nino Russo, Marirosa Toscano, André Grand, and Franck Jolibois

Directional Hydrogen Bonding in the MM3 Force Field: II 1001
Jenn-Huei Lii and Norman L. Allinger

Parallel Pseudospectral Electronic Structure: I. Hartree–Fock Calculations 1017
David Chasman, Michael D. Beachy, Limin Wang, and Richard A. Friesner

Parallel Pseudospectral Electronic Structure: II. Localized Møller–Plesset Calculations 1030
Michael D. Beachy, David Chasman, Richard A. Friesner, and Robert B. Murphy

TheRate: Program for *Ab Initio* Direct Dynamics Calculations of Thermal and Vibrational-State-Selected Rate Constants 1039
Wendell T. Duncan, Robert L. Bell, and Thanh N. Truong

Ab Initio Quantum Chemistry on the Cray T3E Massively Parallel Supercomputer: II 1053
C. P. Sosa, J. Ochterski, J. Carpenter, and M. J. Frisch

Ab Initio Molecular Orbital Study of Energies and Conformers of 3,4-Dihydro-1,2-Dithiin, 3,6-Dihydro-1,2-Dithiin, 4*H*-1,3-Dithiin, and 2,3-Dihydro-1,4-Dithiin 1064
Fillmore Freeman, Choonsun Lee, Henry N. Po, and Warren J. Hehre

G2 *Ab Initio* Calculations on Three-Membered Rings: Role of Hydrogen Atoms 1072
M. Alcamí, O. Mó, M. Yáñez

Searching for Saddle Points of Potential Energy Surfaces by Following a Reduced Gradient 1087
Wolfgang Quapp, Michael Hirsch, Olaf Imig, and Dietmar Heidrich

Parallel Implementation of Divide-and-Conquer Semiempirical Quantum Chemistry Calculations 1101
Wei Pan, Tai-Sung Lee, and Weitao Yang

Erratum

Neighbor-List Reduction: Optimization for Computation of Molecular van der Waals and Solvent-Accessible Surface Areas 1110
Jörg Weiser, Armin A. Weiser, Peter S. Shenkin, and W. Clark Still

Issue 10, July 30, 1998

Editor's Preface v
Paul von R. Schleyer

A Portrait of the Chemist: The Lou Allinger Story vii
J. Philip Bowen

Factors Controlling Relative Stability of Anomers and Hydroxymethyl Conformers of Glucopyranose 1111
Susan E. Barrows, Joey W. Storer, Christopher J. Cramer, Alfred D. French, and Donald G. Truhlar

Asymmetrization Effects on Structures and Populations of the Ground State of Dipolar Donor–Acceptor-Substituted Molecular Organic NLO Materials 1130
Rainer Glaser and Grace Shiahuy Chen

Asymmetry in Methyl Group of Ethane During Internal Rotation: *Ab Initio* Study 1141
Vladimir S. Mastryukov and Svein Samdal

Automated Molecular Mechanics Parameterization with Simultaneous Utilization of Experimental and Quantum Mechanical Data 1146
Per-Ola Norrby and Tommy Liljefors

General Molecular Mechanics Approach to Transition Metal Complexes 1167
Joseph J. Gajewski, Kevin E. Gilbert, and Thomas W. Kreek

Temperature Dependence of TIP3P, SPC, and TIP4P Water from NPT Monte Carlo Simulations: Seeking Temperatures of Maximum Density 1179
William L. Jorgensen and Corky Jenson

Predicting the Vibrational Spectra of Some Simple Fluorocarbons by Direct Scaling of Primitive Valence Force Constants 1187
Jon Baker and Peter Pulay

Issue 11, August 1998

DFT-Predicted Structural, Vibrational, and Bonding Properties of XSiO and X_2SiO (X=F, Cl, or Br) Molecules 1205
M. E. Alikhani and B. Silvi

Parallel Internally Contracted Multireference Configuration Interaction 1215
Abigail J. Dobbyn, Peter J. Knowles, and Robert J. Harrison

Free Energy Calculations in Globular Proteins: Methods to Reduce Errors 1229
Alfredo di Nola and Axel T. Brünger

Integral Transformation with Low-Order Scaling for Large Local Second-Order Møller-Plesset Calculations 1241
Guntram Rauhut, Peter Pulay, and Hans-Joachim Werner

Principal Coordinate Maps of Molecular Potential Energy Surfaces 1255
Oren M. Becker

Molecular Surface Generation Using Marching Tetrahedra 1268
Shek Ling Chan and Enrico O. Purisima

Improved Convergence in Dual-Topology Free Energy Calculations through Use of Harmonic Restraints 1278
Paul H. Axelsen and Daohui Li

Reference Program for Molecular Calculations with Slater-Type Orbitals 1284
J. Fernández Rico, R. López, A. Aguado, I. Ema, and G. Ramírez

Sampling Potential Energy Surface of Glycyl-Glycine Peptide: Comparison of Metropolis Monte Carlo and Stochastic Dynamics 1294
Hanoch Senderowitz and W. Clark Still

Automated Selection of Optimal Gaussian Fits to Arbitrary Functions in Electronic Structure Theory 1300
Claudine C. Tazartes, Christopher R. Anderson, and Emily A. Carter

Inexpensive Vibrational Anharmonicities from Estimated Derivatives: Diatomic Molecules 1315
Parviz Hassanzedeh and Karl K. Irikura

Issue 12, September 1998

Editor's Preface v
Paul von R. Schleyer

A Portrait of the Chemist: The Lou Allinger Story vii
J. Phillip Bowen

Theoretical Study of Structure of Alkali Metal Cyanates and Isocyanates and Their Related Ion Pair S_N2 Reactions 1325
Simon Shun-Wang Leung and Andrew Streitwieser

Averaged Electron Densities for Averaged Conformations 1337
Paul G. Mezey

Low-Barrier Hydrogen Bonds: *Ab Initio* and DFT Investigation 1345
Ganesh A. Kumar, Yongping Pan, C. Jay Smallwood, and Michael A. McAllister

Computational Study on Nature of Transition Structure for Oxygen Transfer from Dioxirane and Carbonyloxide 1353
Anwar G. Baboul, H. Bernhard Schlegel, Mikhail N. Glukhovtsev, and Robert D. Bach

Molecular Mechanics Studies of Acyl Halides: I. Molecular Structures and Conformational Analysis 1370
Joong-Youn Shim and J. Phillip Bowen

Molecular Mechanics Studies of Acyl Halides: II. Vibrational Spectra 1387
Joong-Youn Shim and J. Phillip Bowen

Molecular Mechanics and *Ab Initio* Calculations on Cyclopentadienyl Cations 1402
Bernd Reindl and Paul von R. Schleyer

Heats of Formation of Organic Molecules Calculated by Density Functional Theory: II. Alkanes 1421
Jan Labanowski, Lawrence Schmitz, Kuo-Hsiang Chen, and Norman L. Allinger

Issue 13, October 1998

General Methodology in Two Dimensions for Classical Simulation of Reactive and Nonreactive Events on *Ab Initio* Potential Energy Surfaces 1431
Michael R. Salazar and Richard L. Bell

Global Optimization Using Bad Derivatives: Derivative-Free Method for Molecular Energy Minimization 1445
Ioan Andricioaei and John E. Straub

Accurate Molecular Electrostatic Potentials Based on Modified PRDDO/M Wave Functions: III. Extension of the *PESP* Method for Calculation of Electrostatic Potential-Derived Atomic Charges to Compounds Containing Li^+, Na^+, Mg^{2+}, K^+, Ca^{2+}, Zn^{2+}, and I 1456
Dennis S. Marynick

Systematic Stepsize Variation: Efficient Method for Searching Conformational Space of Polypeptides 1470
Christian T. Klein, Bernd Mayer, Gottfried Köhler, and Peter Wolschann

Atomic Radii: Incorporation of Solvation Effects 1482
Brian J. Smith and Nathan E. Hall

Fast Summation Boundary Element Method for Calculating Solvation Free Energies of Macromolecules 1494
Enrico O. Purisima

Radical Performance Enhancements for Combinatorial Optimization Algorithms Based on the Dead-End Elimination Theorem 1505
D. Benjamin Gordon and Stephen L. Mayo

Development of Modified Force Field for Cation–Amino Acid Interactions: *Ab Initio*-Derived Empirical Correction Terms with Comments on Cation–π Interactions 1515
Oreola Donini and Donald F. Weaver

Spin-Orbit Effects on Structures of Closed-Shell Polyatomic Molecules Containing Heavy Atoms Calculated by Two-Component Hartree–Fock Method 1526
Young-Kyu Han, Cheolbeom Bae, Yoon Sup Lee, and Sang Yeon Lee

Multiple Time Step Algorithms for Molecular Dynamics Simulations of Proteins: How Good Are They? 1534
Helmut Grubmüller and Paul Tavan

Book Review 1553

Issue 14, November 15, 1998

Constraint Dynamics Algorithm for Simulation of Semiflexible Macromolecules 1555
Xiong-Wu Wu and Shen-Shu Sung

Exploring Potential Energy Hypersurfaces for Triple Symmetric Inversion in 3-Azabicyclo[3.3.1]Nonan-9-One and Its *N*-Methyl Derivative 1567
N. J. Smeyers, F. J. Melendez, and Y. G. Smeyers

Molecular Quantum Similarity Measures as an Alternative to Log P Values in QSAR Studies 1575
Lluís Amat, Ramon Carbó-Dorca, and Robert Ponec

Theoretical Description of Solvent Effects on Fluorescence Spectra of Bulky Charge Transfer Compound DMA-DMPP 1584
Andreas B. J. Parusel, Rudolf Schamschule, and Gottfried Köhler

First-Order Relativistic Corrections to MP2 Energy from Standard Gradient Codes: Comparison with Results from Density Functional Theory 1596
Robert Franke and Christoph van Wüllen

Economical Treatments of Relativistic Effects and Electron Correlation in WH_6 1604
Roland H. Hertwig, Wolfram Koch, and Brian F. Yates

Assessing Energy Functions for Flexible Docking 1612
Michal Vieth, Jonathan D. Hirst, Andrzej Kolinski, and Charles L. Brooks III

Assessing Search Strategies for Flexible Docking 1623
Michal Vieth, Jonathan D. Hirst, Brian N. Dominy, Heidi Daigler, and Charles L. Brooks III

Optimizing Efficiency of Perturbative Monte Carlo Method 1632
Tom J. Evans and Thanh N. Truong

Automated Docking Using a Lamarckian Genetic Algorithm and an Empirical Binding Free Energy Function 1639
Garrett M. Morris, David S. Goodsell, Robert S. Halliday, Ruth Huey, William E. Hart, Richard K. Belew, and Arthur J. Olson

Vibrational Projection Analysis: New Tool for Quantitatively Comparing Vibrational Normal Modes of Similar Molecules 1663
Anthony K. Grafton and Ralph A. Wheeler

Issue 15, November 30, 1998

Influence of Environment on Proton-Transfer Mechanisms in Model Triads from Theoretical Calculations 1675
G.-S. Li, B. Maigret, D. Rinaldi, and M. F. Ruiz-López

Hybrid Monte Carlo with Adaptive Temperature in Mixed-Canonical Ensemble: Efficient Conformational Analysis of RNA 1689
Alexander Fischer, Frank Cordes, and Christof Schütte

Static and Frequency Dependent Polarizabilities and Hyperpolarizabilities of H_2S_n 1698
S. G. Raptis, S. M. Nasiou, I. N. Demetropoulos, and M. G. Papadopoulos

Parallel Algorithm for Efficient Calculation of Second Derivatives of Conformational Energy Function in Internal Coordinates 1716
Shugo Nakamura, Mitsunori Ikeguchi, and Kentaro Shimizu

Calculation of Solvation Free Energy Using RISM Theory for Peptide in Salt Solution 1724
Masahiro Kinoshita, Yuko Okamoto, and Fumio Hirata

MC(JBW): Simple but Smart Monte Carlo Algorithm for Free Energy Simulations of Multiconformational Molecules 1736
Hanoch Senderowitz and W. Clark Still

Performance of Parallel TURBOMOLE for Density Functional Calculations 1746
Malte von Arnim and Reinhart Ahlrichs

DefPol: New Procedure to Build Molecular Surfaces and Its Use in Continuum Solvation Methods 1758
Christian S. Pomelli and Jacopo Tomasi

Calculation of Clustered Eigenvalues of Large Matrices Using Variance Minimization Method 1777
Emili Besalú and Josep Maria Bofill

Meshed *tert*-Butyl Gears in a Quasirigid Backbone 1786
Anatoly M. Belostotskii and Alfred Hassner

Issue 16, December 1998

Theoretical Study of 1,3-Dipolar Cycloadditions of Nitrone and Fulminic Acid with Substituted Ethylenes 1795
Eric C. Magnuson and Julianto Pranata

New Approach for Representation of Molecular Surface 1805
Wensheng Cai, Maosen Zhang, and Bernard Maigret

Theoretical Study of Intermolecular Potential Energy Surface for HCl Dimer: Example of Nonspherical Atom–Atom Exchange Repulsion Interaction 1816
Jose M. Hermida-Ramón, Ola Engkvist, and Gunnar Karlström

Theoretical Study of Ester Enolate–Imine Condensation Route to β-Lactams 1826
E. del Río, R. López, M. I. Menéndez, T. L. Sordo, and M. F. Ruiz-López

ELECT++: Faster Conformational Search Method for Docking Flexible Molecules Using Molecular Similarity 1834
Shingo Makino and Irwin D. Kuntz

Pyrrolizidine Alkaloids Necine Bases: II. Conformational Analysis of Free Bases 1853
Marcelo Giordan

Conformers of Gaseous Protonated Glycine 1862
Kui Zhang, Alice Chung-Phillips

Use of Symmetric Rank-One Hessian Update in Molecular Geometry Optimization 1877
Alexander V. Mitin

Self-Consistent Field Calculations Using Two-Body Density Functionals for Correlation Energy Component: I. Atomic Systems 1887
F. Moscardó and Angel J. Pérez-Jiménez

Self-Consistent Field Calculations Using Two-Body Density Functionals for Correlation Energy Component: II. Small Molecules 1899
F. Moscardó, Angel J. Pérez-Jiménez, and J. Américo Cjuno
